

# Some Questions for Today

- What is the status of the implementation of the IGACO strategy?
- What efforts need to be undertaken to develop an integrated system of observational data sources and predictive models that addresses the policy relevant science questions of TF HTAP?
- What next steps will help advance the common interests of TF HTAP, GAW, and GEO?
- How can we build upon existing systems? How can we leverage investments being made in the creation of GEOSS and in the development of regional air quality forecasting systems?
